PROFILE

Experienced Python developer specializing in system integration, automation, and workflow design. I build scalable services and microservices, create advanced n8n workflows, and integrate LLM-based solutions.

Strong background in integration projects (IBM ACE), databases, and containerization.

SKILLS

- Python
- SQL
- Microservices
- Docker
- CI/CD
- GitHub
- Azure
- REST / SOAP
- Unit & Integration Testing

LANGUAGES

- Polish (Native)
- English (B2 – Professional Working Proficiency)

INFO

Citizenship: Polish

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER / PYTHON DEVELOPER at Voltus 11.2025 – 01.2026

- Development and maintenance of backend systems in Python.
- Implementation of integration solutions and automation of data processing workflows.
- Collaboration in distributed environments and performance optimization of services.

N8N & PYTHON DEVELOPER at Agentic 02.2025 – 10.2025

- Design and optimization of advanced workflows in n8n.
- Integration with external APIs (including Microsoft Graph API).
- Adapting LLM models for data classification and extraction (prompt engineering).
- Implementation of business logic in Python and JavaScript.
- Building microservices supporting automation (OCR, email processing).

PYTHON DEVELOPER at IBPM 03.2024 – 02.2025

- Development of Python microservices (Sanic) and data processing solutions.
- Business process automation using messaging systems and ESB.
- Database management: PostgreSQL, Elasticsearch, Redis.
- Application containerization (Docker), unit and integration testing.

ESB DEVELOPER / INTEGRATION ENGINEER at IBPM 07.2022 – 02.2024

- Design of integration flows in IBM App Connect Enterprise (ESQL).
- Implementation of SOAP/REST integrations and XML/XSD transformations.
- Optimization and testing of scalable integration solutions.
- Direct collaboration with clients and Scrum teams.

EDUCATION

BENG IN COMPUTER SCIENCE at Lublin Academy WSEI 2023 – 2026

Specialization: Software Engineering and Mobile Technologies

INTERESTS

I am passionate about new technologies, particularly artificial intelligence (LLMs, RAG) and process automation. I stay active through sports, which helps maintain focus and balance in my professional work.
